

AI-Powered Digital Operation Excellence Platform

Who are we

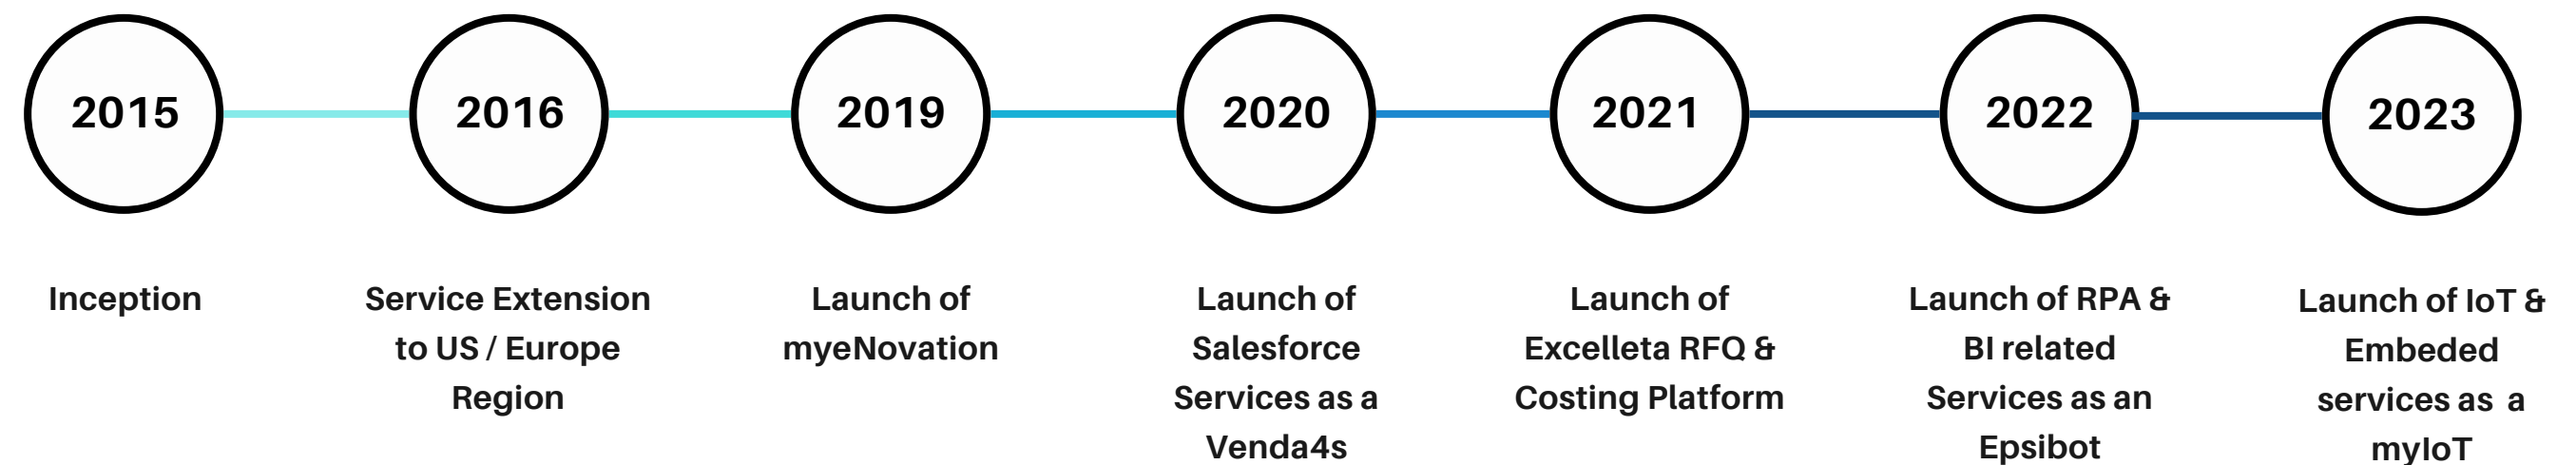

IT Services and Solutions company, providing digital enablement and product development offerings. In an age when technology plays a critical role in business strategy, we are pioneering industry-specific solutions and new age digital practices that enable rapid growth, rich value, and specific business outcomes.

Our customer services are driven by 4 P core values i.e

Passionate about the work, **Perfection** in work, **Pride** about the work, and **Prompt** in delivering work.

Our core values make us a trusted partner that can own the problem and deliver technology solutions faster than ever.

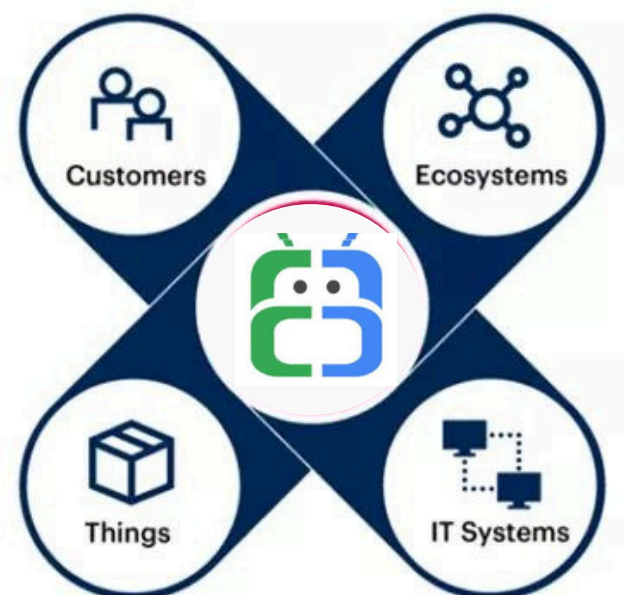

Industry **Automation** Services & Solution

At Greentinsolution, we recognize the pressing demand for Industry Automation. Drawing from valuable experience and feedback, we proudly offer comprehensive Industry 4.0 solutions all under one roof. Our services include

RPA & BI Tools

Epsibot

Optimize decision-making processes with the assistance of BI tools. Maximize efficiency & minimize effort through Robotic Process Automation (RPA).

Salesforce Services

Venda4S

A specialized Salesforce Services company, we offer Managed and Staffing services, achieving exemplary customer satisfaction ratings by providing tailored solutions encompassing customization, optimization, integrations, and support through our expert team. Proficient across various Salesforce Clouds, including Sales, Service, Marketing, and Financial.

IoT, Embedded & Industry 4.0

myIoT

IoT solutions help build massive networks of IoT devices, reducing complexity, ensuring device efficiency, and driving innovation across industries looking for growth opportunities and operational efficiencies.

Accountability and Shop Floor Management

Save Cost, Increase Profitability through Business Excellence and Employee Engagement !!

Let's Go

About Shop Floor Management

Shop Floor Management refers to the systems and processes used to supervise and optimize daily operations on the production floor. It emphasizes real-time visibility, communication, and problem-solving where value is created.

Accountability refers to clearly defining roles, responsibilities, and expectations at every level of the organization and ensuring that individuals or teams take ownership for their work, decisions, and outcomes.

End-to-end solution built to overcome the challenges being faced by industries in manual processes.

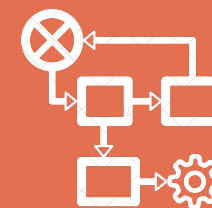

It fully automates the entire process right from submission to Approval and

Secure Cloud Solution

- A secure cloud solution that reduces infrastructure maintenance burden
- Ready to use product so no upfront investment for developing the solution

Integration

- Can be integrated with HRMS and ERP systems
- Succes Factor, Ascent, Darwin Box are current integration partners

Global Best Practices

- Product is nurtured with best practices for Suggestion and Kaizen
- Along with cutting-edge technology, organizations get the solution built with global industry standards

Why myeNovation?

- Builds CONTINUOUS IMPROVEMENT Culture
- Engage everyone to actively participate in the GROWTH of ORGANIZATION
- Guaranteed increment in SAFETY, QUALITY & SAVING
- Quick ROI by reducing PAPER COST & HUMAN RESOURCE COST
- Easy decision making due to Total TRANSPERENCY & overall CONTROL on the process

Key Features

- Multi Level DASHBOARD & REPORTs
- MOBILE NOTIFICATIONs & EMAILs for progress of suggestions
- Visual Display to CFT Team
- WORKFLOW & SCREEN customization as per organization need
- Fully self configurable Application through Admin level settings

Key Aspects of Accountability

- **Clarity of Responsibility:** Everyone knows what they are responsible for.
- **Measurement:** KPIs and metrics are tracked for performance.
- **Transparency:** Regular reporting, open communication.
- **Follow-up & Review:** Issues are reviewed and corrective actions are taken.
- **Ownership Culture:** Employees don't pass the blame but look for solutions.

Key Aspects of Shop Floor Management

- **Daily Management:** Supervisors / OE inspect the machine daily.
- **Visual Management:** Boards, charts, displays showing production status, issues, targets.
- **Performance Metrics:** Tracking downtime, quality issues, cycle times, etc.
- **Standard Work:** Defined processes to ensure consistency and productivity.
- **Quick Issue Resolution:** Problem escalation mechanisms and real-time alerts.
