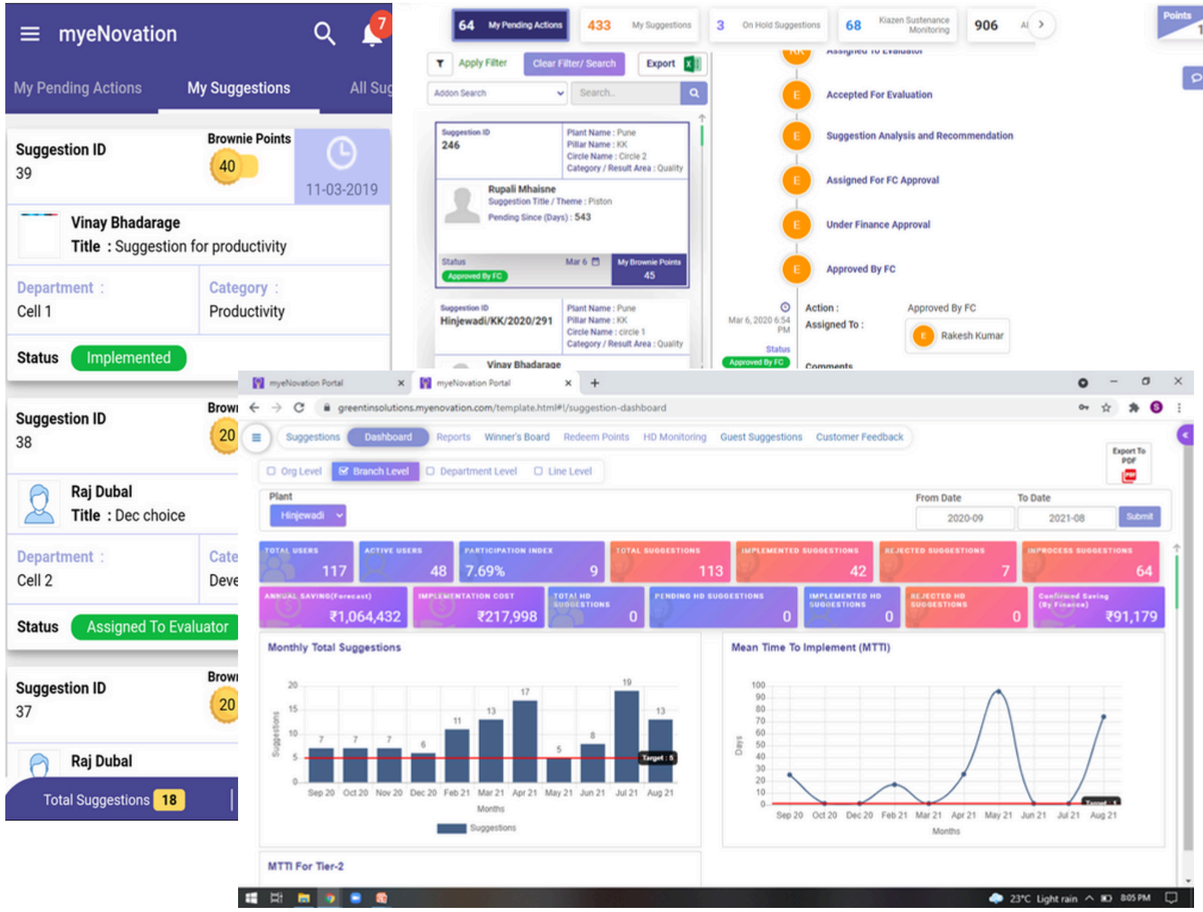
About Kaizen Platform



End-to-end solution built to overcome the challenges being faced by industries in manual processes.
It fully automates the entire process right from submission to implementation and its sustenance.
Due care is taken to keep every stakeholder engaged and motivated.

Secure Cloud Solution

- A secure cloud solution that reduces infrastructure maintenance burden
- Ready to use product so no upfront investment for developing the solution

Integration

- Can be integrated with HRMS and ERP systems
- Succes Factor, Ascent, Darwin Box are current integration partners

Global Best Practices

- Product is nurtured with best practices for Suggestion and Kaizen
- Along with cutting-edge technology, organizations get the solution built with global industry standards

myNu AI

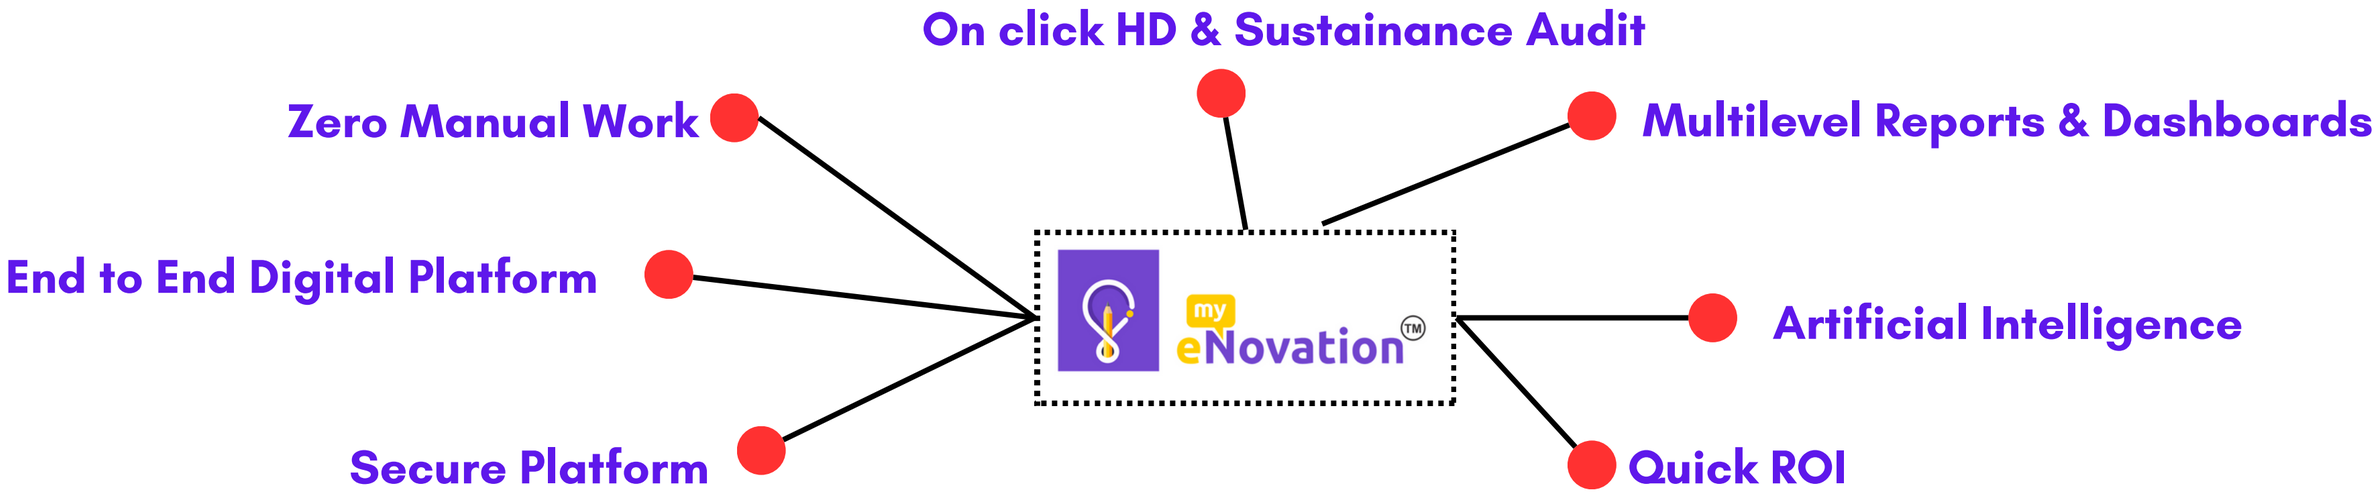
Why Kaizen Platform

Challenges in Manual Process

Complex Submission	Lack of timely feedback	Time consuming & challenging
Slows down entire process	Realtime monitoring	Lack of consolidated analysis
No horizontal deployment	Sustainability	Data Inconsistency and Loss

myeNovation The Solution



Why myeNovation?

Every Employee Sees a Problem. Every Mind Holds a Solution.

“ if you give people the right platform to express themselves.”

AI-powered myeNovation captures these ideas, organizes them, and transforms them from scattered individual efforts into a powerful culture of continuous improvement and operational excellence.

Business Case Study I

Problem Statement

One of our client organizations with an average strength of 300 employees per plant struggled *to get the maximum ideas* from the employees.
Post assessment and analysis we observed,

- Employees are unhappy since they do not get timely feedback and appreciation
- No easy process for giving ideas
- Flaws and challenges in the reward system
- MTTI is high due to people-oriented approach
- Some biased behavior impacts the overall engagement

The Solution

Mobile App

- Our mobile app enabled users to submit ideas anytime and anywhere i.e. even while returning home on the bus
- Immediate notifications keep them updated
- In mobile-restricted areas, KIOSK with portal access gives the flexibility to submit ideas

Reward System

- Configurable brownie points system makes the reward system transparent
- The winners board automatically displays monthly winners without manual intervention
- Flexibility for users to redeem their brownie points online

The Result

- 65 % increment in ideas within 6 months
- Quality Improved and reduced customer complaints
- Achieved zero accident months
- MTTI is Reduced

Business Case Study II

Problem Statement

This organization with per plant employee strength of 500 was really struggling with the sustenance of ideas, especially cost-saving ideas and exchanging good practices within the organization

Post assessment and analysis we observed

- No process for auditing and monitoring sustenance
- No inclusion of finance team for cost-saving verification
- No set process and responsible person for evaluating information received from other plants/branch
- Manual erroneous process for implementation of the same idea across various departments/lines

The Solution

Sustenance Audit

- The audit feature allows an audit of the benefits of an idea over the period
- It allows the organization to understand the overall sustenance ratio
- Easy scheduling process release the burden of manually tracking the audit schedules

Verification & HD

- The verification feature allows assigning cost-saving ideas to the finance team for verification
- Accurate saving figures reflect on the dashboard due to the finance team's involvement
- HD feature allows sharing ideas with other plants/branch

The Result

INR 97,00,000

Confirmed savings within a year

Non Tangible benefits like increased employee engagement, motivation, and safety are added advantage

Results

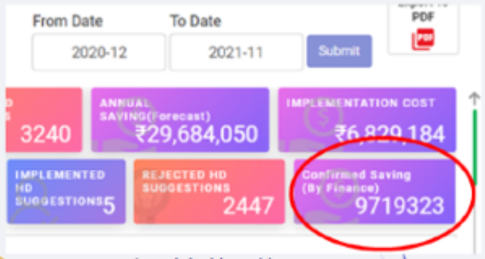
Scaleup ROI

Scaleup Kaizens

Result 1 - 97Lakh Savings in an Year

Implemented kaizen solution with below features

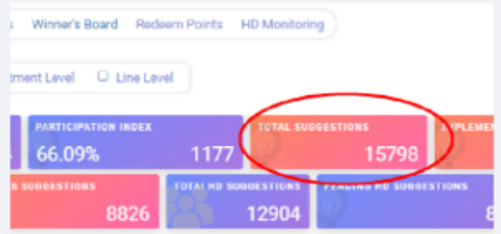
- Enabled brownie points redemption. The promotion of 'more cost saving, more brownie points' motivated employees and increased the number of cost saving kaizens
- Saving verification by finance team helped to get the accurate and confirmed saving results



Actual dashbaord image

Result 2 - 15000 Kaizens in an Year

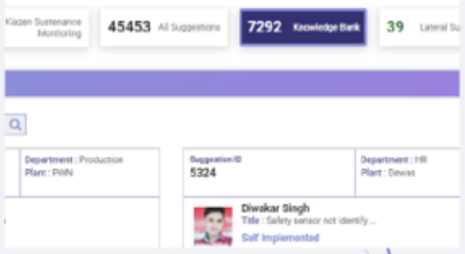
- Launch of kaizen portal really bosted the employee engagement but were not enough to meet the expectations. Post analysis, suggested to install the kiosk for employees to capture the kaizens during the breaks. This really increased the kaizen numbers.
- Further, we launched mobile app which made employees to post the kaizen from anywhere. We observed 60% hike in the kaizens



Actual dashbaord image

Result 3 - 7000 Kaizen Exchanged

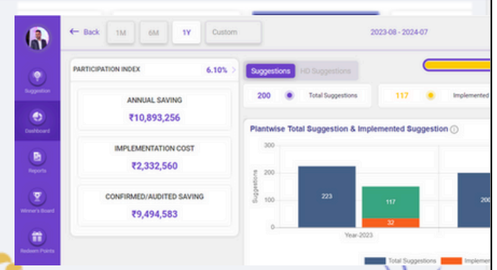
- Sustenance module helped client to monitor and audit the sustenance of kaizen and allowed to close the kaizen only once sustained. This resulted in confirmed saving through sustained kaizens.
- Further, Horizontal Deployment and Knowledge Bank features enabled plants to exchange the best kaizens and share the best practices



Actual dashbaord image

Result 4 - 10 Time ROI in an Year

- Sustenance module helped client to monitor and audit the sustenance of kaizen and allowed to close the kaizen only once sustained. This resulted in confirmed saving through sustained kaizens.
- **Further - Finance Verification process confirms the acyual savings and actual Implementation cost for finding the actual ROI of the application**



Actual dashbaord image

About Suggestion Module

- No dedicated Resource
- Horizontal Deployment
- Realtime Tracking
- Lower MTTI
- Realtime Notifications
- R & R
- Budget Approval
- Higher Sustainability
- Confirmed Savings
- High ROI
- Centralized Monitoring
- Data Analysis & Consolidation

End-to-end solution built to overcome the challenges being faced by industries in manual processes.
It fully automates the entire process right from submission to implementation and its sustenance.
Due care is taken to keep every stakeholder engaged and motivated.
