# What are the challenges with conventional tagging process?

### Complex submission

OEs to get the physical tags, write the issue and hang on the machine such that it will be visible & help safety officer to locate the correct part

### Lack of timely feedback

Timely feedback is a major block to the success of manual program

### Geographical & Time constraint

Manual process always have geographical and time constraint which limit the number of issue reporting

### Time consuming and challenging

Segregation of data is always time consuming challenging activity

### Lack of consolidated analysis

Lack of data consolidation always make leadership struggle to understand employee contribution, process timelines, budget spent and benefits gained

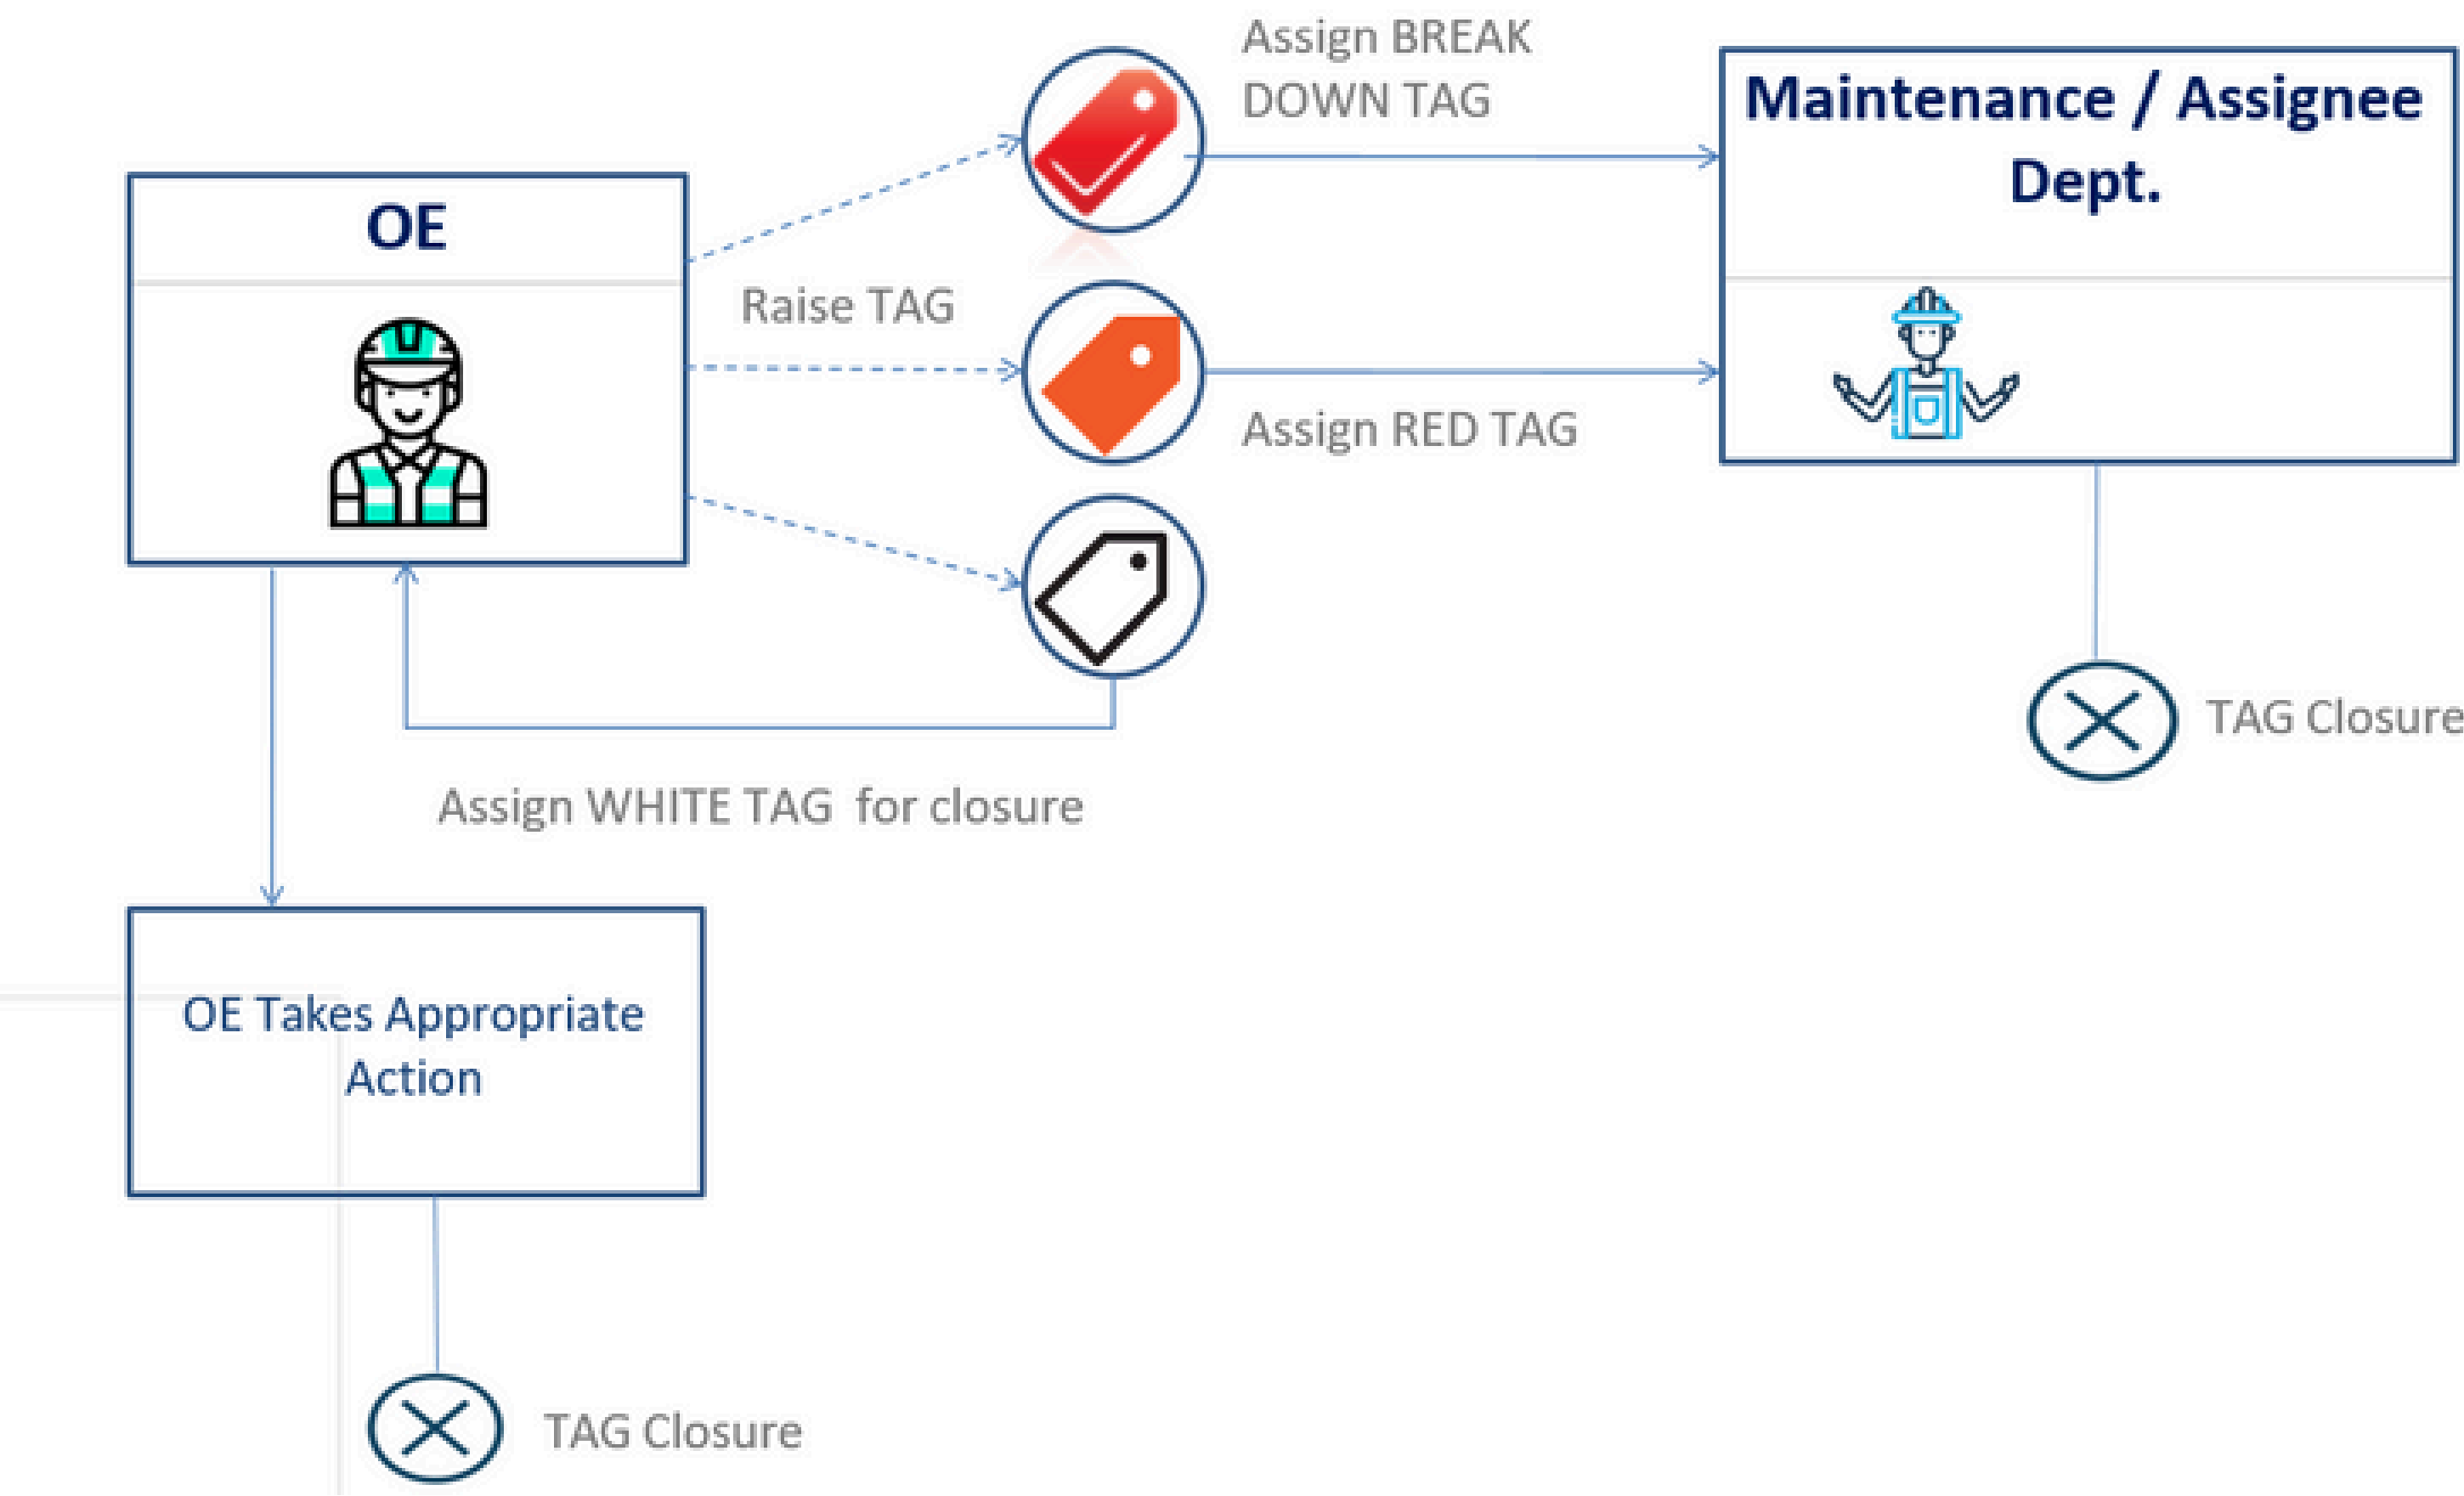

### Slows down entire process

Physical dependency of each individual involved, tremendously slows down the overall process
